CPR Teddy Trainikins

"I just had to let you know the CPR Teddy is GREAT! I had the opportunity to use him for the first time with a group of pre-school and grade school teachers. After using the regular child and infant manikins I had them practice on Teddy. They were amazed at the difference in the actual depth of compression needed. While the manikins are a vital part of the instruction the Teddy gives a much better "realistic" feel for depth of compression. No instructor should be without a CPR Teddy in their instructional tools. Thank you for all you do for ECSI instructors."
